

FT: Onboarding + 1st Experience

UR Team Jan '25 

Shire Kedem

What is the **purpose** of this research?

Gain a **deeper understanding of users' first interaction and overall app experience, to identify opportunities** for improvement, making the onboarding and home screen even more engaging and **encouraging users to return**

What was done

Audience

24 users went through an unmoderated user testing:

- **8 New users** who edit their photos using various editing apps, completed the onboarding process and saw the homescreen for the first time
- **8 Recent FT users** who joined the app in the past 2 weeks – 2 months, reviewed the homescreen & reflected on their first experience
- **8 Existing Facetune users** who joined the app in the past 2 weeks – 10 years, shared how personalized they find the home screen and what drives them to return for future sessions

What was done 🕵️

RQ for User Testing

1. How do users **perceive** the onboarding process?
2. How does their first experience **align** with their **expectations or goals**?
3. What elements **encourage users to return** for another session?
4. How do users **perceive the personalization of the FT home screen**, and do they believe the **onboarding process influences this personalization**?
5. What are users' **impressions** of the homescreen?

Insights

Entering the app

What is the main goal for joining the app?

When joining or entering the app, most users have a specific goal in mind

Goals Examples:

- Want to edit a particular photo
- Using a specific feature like object removal or blemish fixing
- Editing a photo for a specific occasion, like a profile picture or professional use

After achieving their goal, users may also explore other features

What are the ways these users accessed the app?

- **The app store** is a common way to first discover FT, drawn by its top-rated status
- **Word of mouth** plays a role, with its strong reputation encouraging recommendations among friends
- **Online reviews** highlighting its features and ease of use further influence user discovery, e.g. through TikTok videos or by searching for top photo editing apps

Overall onboarding experience

How do users perceive the onboarding process?

**The onboarding experience is seen as
fast, clear, relevant, and mainly -
meaningful for a tailored experience**

How do users perceive the onboarding process?

Users expect the onboarding to shape their HS & experience, believing the questions are designed to personalize their future app usage

"I expect to see features that I selected in the onboarding process or else I felt like the onboarding would be useless otherwise"

How do users perceive the onboarding process?

Users expected that if they would choose 'none' or 'basic' editing experience, they would see guidance & tutorials

In the 2nd onboarding question, about photo & video editing experience, choosing 'none' or 'basic' are believed to lead to more guidance and tutorials, while 'advanced' is expected to present complex features without guidance

How do users perceive the onboarding process?

Users expect their selected features from the 3rd question to be prominently displayed and easily accessible on the HS

Users appreciated the 3rd question for addressing their desired features and anticipate these features to be clearly highlighted and easy to locate on the home screen for better usability

Overall 1st experience

What are users' impressions of the homescreen?

The home screen is widely perceived as clear and user-friendly, with an intuitive layout, and accessible features, all without feeling overwhelming

Aligned with [previous research](#)
made by the UR team

What are users' impressions of the homescreen?

**However, there are
2 pain points to notice**

What are users' impressions of the homescreen?

Users come with a specific goal for their image – however the "+" sign isn't immediately discoverable

Leaving users unsure where to upload their image to start editing at first glance

***Should be noted – this graph shows the "+" sign is the most clicked element on the home screen, indicating that while users may not spot the CTA immediately, they eventually find it

What are users' impressions of the homescreen?

New users struggle to understand the full value of the app because they lack full access to its features

New users **can't interact** with all features or explore the app's full value **before deciding** if it's worth paying or committing to a free trial, **which they find frustrating**. Concerns about forgetting to cancel the free trial add to hesitation

What are users' impressions of the homescreen?

The visually engaging 'Trending' section instantly captured users' attention and made it easier for users to understand the feature's purpose

Users appreciate its **interactivity, the before-and-after visuals** that clearly show how features work, and its value for exploring popular and new features

Personalization

Personalization is very important to users, and they highly value it

Why?

1. They believe it can make every feature feel relevant to their specific needs
2. Help them find tools quickly
3. Simplify the editing experience
4. Introduce new features that will be useful to them specifically

Personalization is very important to users, and they highly value it

*"I believe being able to personalize a HS allows me to be **more efficient at my tasks**"*

*"For me, having a personalized home screen allows me **to navigate faster**"*

*"It'd make me feel like the **brand knows me** and I can look at edits that are **more relevant to my personal taste**"*

*"It makes it **a lot easier to use** the app due to the **instant access to commonly used features**"*

*"I feel like the app is **more relevant to me and my needs**"*

Personalization leads to Fast Access & Efficacy

How Do Users View FT HS Personalization and Onboarding Influence?

The HS failed to meet personalization expectations set during onboarding, feeling generic & disconnected from user preferences

How Do Users View FT HS Personalization and Onboarding Influence?

Examples

New users
anticipated
relevant capabilities
& features to be
highlighted
based on their
onboarding answers

Recent & Existing
users found the
HS lacking
personalization
elements, making
it feel unrelated to
their specific
use and needs

What Personalization Means to Users?

- **Personalized Greeting:** Seeing their name at the top with a "Good Morning" or "Good Evening" message
- **Most Used Features:** A dedicated section showcasing their frequently used tools, making them quick and easy to access
- **Tailored Recommendations:** Suggestions for features based on their preferences and past usage
- **Customized Quick Edits:** Quick edits reflecting their most commonly used editing tools

How Do Users View FT HS Personalization and Onboarding Influence?

Only the top menu led users to believe it was personalized based on their onboarding choices, making it the only indicator of home screen personalization

Believed to be tailored to them through:

- Seeing features selected in the 3rd onboarding question
- Seeing their frequently used features

Both are mostly popular features

Motivations

Users chose to return to Facetune for another session because:

Ease of Use

**Quality of Results
Leads to Trust**

**The Range of
Editing Tools**

**Returning for
Specific Features**

**A Trusted and
Known Brand**

Users chose to return to Facetune for another session because:

Ease of Use

Refers to a simple, intuitive experience that lets users start editing instantly, without a steep learning curve or special knowledge

Quality of Results Leads to Trust

Users appreciated the app's consistent high-quality results, reinforcing their trust in its capabilities

Users chose to return to Facetune for another session because:

The Range of Editing Tools

The variety of tools makes users feel they have everything they need for any edit, unlike others that require switching for different tasks

Returning for Specific Features

Users appreciated features like remove objects, clear blemishes, one-tap enhancements, and sliders, which continue to bring users back

Users chose to return to Facetune for another session because:

A Trusted and Known Brand

As a well-recognized brand used by many, FT earns users' trust as a reliable choice, encouraging them to return

Recommendations

Quick copy wins to create *a sense of personalization* and meet initial user expectations from onboarding 🚀

- 1) **Display the user's name with a personalized greeting** (e.g., "Good Morning, Name") in the top corner
- 2) **Add a headline above the top menu**, such as "Your Most Used Features" or "Because You Previously Used"
- 3) **Update the "Trending" headline** to "Recommended for You" or "Based on What You Like"

A photo from a data experiment adding a 'For You' label to top menu features, showing interesting results—see details in the notes below

Impactful outcomes for creating a *truly* personalized experience

Tailoring Sections to
User Preferences
and Usage

Suggestions

Impactful outcomes for creating a *truly* personalized experience

Tailoring Sections to
User Preferences
and Usage

Enabling Quick Access
to User Goals

Image-Based Edit
Suggestions

- Update the **top menu** to show most-used features or onboarding selections
- Align the **trending section** with user preferences to drive exploration

Impactful outcomes for creating a *truly* personalized experience

Tailoring Sections to
User Preferences
and Usage

Enabling Quick
Access to User Goals

Image-Based Edit
Suggestions

- Update the **top menu** for quick access to frequently used features
- **Tailor quick edits** to reflect each user's most-used tools for quick results
- Make the **AI assistant more goal-oriented** by asking, "What do you want to do today?" and directly implementing the request instead of suggesting features

Impactful outcomes for creating a *truly* personalized experience

Tailoring Sections to
User Preferences
and Usage

Enabling Quick
Access to User Goals

Image-Based Edit
Suggestions

- suggesting edits **based on the uploaded image**, such as teeth whitening for smiles or sky enhancement for landscapes

Keep the interactive visuals in the HS redesign, as a tool to showcase the app's value, highlight important features, and demonstrate its capabilities

Either for the 'Trending' section or other areas, relevant for both IOS or Android

Offer a limited-time *guided preview* or *feature demo* to encourage users to subscribe/ sign to the free trial

Showcase the app's most valuable features with an interactive hands-on walkthrough to let users experience its potential without full access yet

After the preview, prompt them to start a free trial or subscribe to unlock everything and personalize their experience

E.g., FaceApp provides a visual, interactive explanation for each feature before use, in the 1st experience

Thank you!

Appendix

What are users' impressions of the homescreen?

Users believe the AI Assistant generates edits automatically based on any user request
