

New Audiences – Survey Analysis

UR, Nov '25 

Shire Kedem

What was the **purpose** of this survey?

At first, we aimed to learn about non-Facetune Gen Z users:

- Understand Gen Z's **key motivations** and **goals** when editing photos
 - What they aim to achieve, e.g., aesthetics, creativity, self-expression, self-image)
- Explore how Gen Z defines the overall **"vibe"** or **aesthetic** of an image – what elements contribute to it
- Uncover Gen Z's current editing **habits** and **behaviors**
 - Which **aspects** of an image they typically edit (e.g., face, body, lighting, filters), and what **tools** they use most often.
- Assess **awareness** and **perceptions** of Facetune

What was done

After reviewing the results of the Gen Z survey, the team became interested in exploring the **differences** and **similarities** between **non-Facetune Gen Z** users and **non-Facetune Millennials and Gen X users**. To do so, four separate surveys were launched:

1

Gen Z females

- Ages: 18–27
- N. of participants: 234 participants

2

Gen Z males

- Ages: 18–27
- N. of participants: 100 participants

3

Millennials

- Ages: 27–45
- N. of participants: 102 participants

4

Gen X

- Ages: 45–60
- N. of participants: 100 participants

***These participants are not Facetune or FaceApp users – instead, they typically use other editing apps such as VSCO, Tezza, Adobe Lightroom, or Instagram’s built-in tools.

Main Findings

Across all groups, lighting ranked as the top factor ★

Whether the question focused on their **main editing goals**, what makes a photo **look good** or **aesthetic**, or which elements they **typically edit**.

**When asked, “What makes a photo look good or aesthetic?”
the top 3 elements were **the same across all groups****

Rank	Gen Z Female (n=234)	Gen Z Male (n=100)	Millennials (n=102)	Gen X (n=100)
#1	Lighting 70.9%	Lighting 79.0%	Lighting 79.4%	Lighting 74.0%
#2	Background 59.8%	Background 69.0%	Background 53.9%	Background 42.0%
#3	Camera Angle 49.6%	Camera Angle 48.0%	Camera Angle 49.0%	Camera Angle 40.0%
#4	Filters 41.9%	Outfit 44.0%	Facial Expression 26.5%	Facial Expression 33.0%

When asked, “What aspects of a photo do you usually edit?” lighting was still universal

Rank	Gen Z Female (n=234)	Gen Z Male (n=100)	Millennials (n=102)	Gen X (n=100)
#1	Lighting/Color 69.5%	Lighting/Color 73.0%	Lighting/Color 85.3% ★	Lighting/Color 69.0%
#2	Adding Filters 44.6% (tied) ★	Photo ratio/ Cropping 52.0%	Photo ratio/ Cropping 60.8%	Photo ratio/ Cropping 55.0%
#3	Photo ratio/ Cropping 44.6% (tied)	Adding Filters 48.0% ★	Removing Objects 44.1%	Removing Objects 47.0%
#4	Removing Objects 33.9%	Removing Objects 40.0%	Adding Filters 42.2%	Adding Filters 36.0%
#5	Skin Smoothing 33.0%	Creative Effects 28.0% ★	Skin Smoothing 28.4%	Skin Smoothing 25.0%

Main insights:

- **Gen Z** users apply **filters significantly more** than older groups – adding filters ranks #2–3 for Gen Z, but only #4 for older groups.
- **Gen Z males** are the only group with **“Creative Effects”** in their top five, while all other groups rank **“Skin Smoothing”** #5 (beauty enhancement edits)

Body reshaping and face adjustments ranked among the **lowest priorities** across all groups

Element	Gen Z Female (n=234)	Gen Z Male (n=100)	Millennials (n=102)	Gen X (n=100)
Body reshaping	#9, 10.7%	#8, 14% (tied)	#10, 2.9%	#9, 8%
Face adjustments (e.g. eyes, jawline, nose)	#8, 18.5%	#9, 14% (tied)	#9, 6.9%	#8, 8%

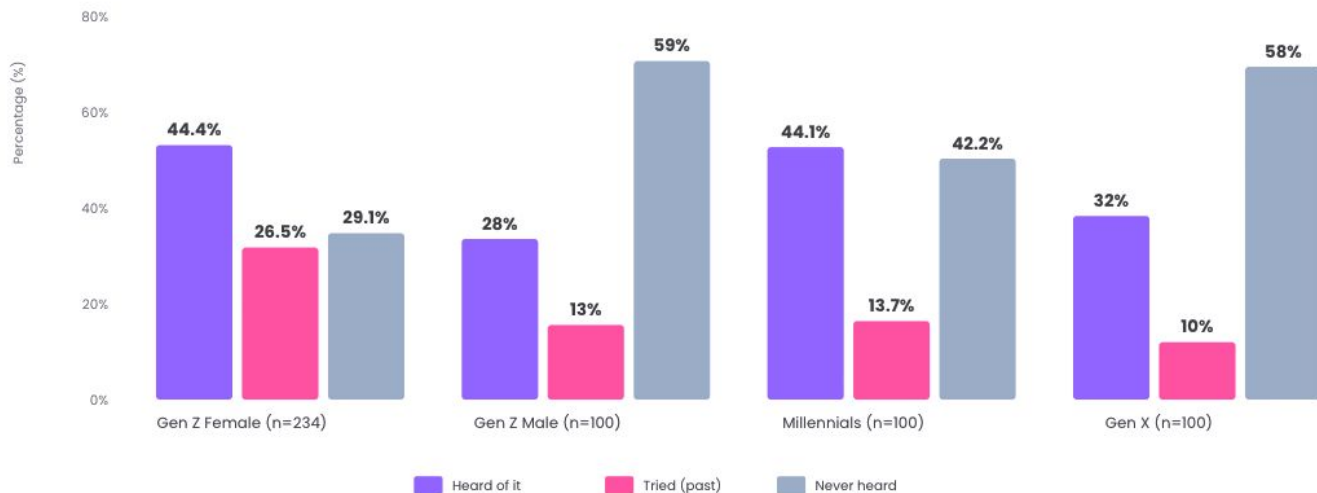

Main insights:

- **Gen Z female** users still show **some engagement with face adjustments**, though overall interest remains low compared to other elements.
- **Millennials and Gen X** place minimal emphasis on body or face edits.

***It's important to note that participants are not current Facetune or FaceApp users, which may explain these lower rankings.

Facetune awareness & usage

Facetune Awareness & Usage Across Demographics

Main insights:

- **Gen Z females** show the **highest awareness** and **past use**
- **Gen Z males** and **Gen X** show **low** brand **recognition**
- **Millennials** sit in the middle – **aware but not active users**

"What word comes to mind when you think of FT?"

Key Insights:

- Functional associations dominate: "**Face**" (160) and "**Editing**" (150) account for 58% of keyword mentions.
- **Authenticity concerns** were noted in **12.9%** of responses, with participants using words such as **fake**, **catfish**, artificial, plastic, unnatural, and inauthentic.
- **Millennials** show **highest** authenticity concern with **18% mentions** compared to:
 - 15.4% Gen Z Females
 - 9% Gen X
 - 5.9% Gen Z Male

Next steps

Explore **aesthetic preferences & needs** – identify **which kinds of lighting and backgrounds** users (especially Gen Z) find most **appealing** and **valuable**.

26.5% of Gen Z females tried Facetune but stopped – we'll dive deeper to understand **why**: what **didn't work** and what **barriers** exist.

Run a parallel survey with **Facetune & FaceApp** users to **compare patterns and deepen our understanding**.
